

## CLAIMS

1. A 2-amino-6-benzyloxypurine solvate.
- 5 2. A 2-amino-6-benzyloxypurine hydrate.
3. A 2-amino-6-benzyloxypurine alcoholate.
4. A 2-amino-6-benzyloxypurine methanolate.
- 10 5. A 2-amino-6-benzyloxypurine ethanolate.
6. A cubic crystal of 2-amino-6-benzyloxypurine.
- 15 7. A columnar crystal of 2-amino-6-benzyloxypurine.
8. A production method of a cubic crystal or a columnar crystal of 2-amino-6-benzyloxypurine, which comprises crystallization from a solvent containing at least one kind of  
20 solvent selected from the group consisting of alcohol and water.
9. A production method of a 2-amino-6-benzyloxypurine alcoholate, which comprises crystallization from alcohol.
- 25 10. A production method of a 2-amino-6-benzyloxypurine hydrate, which comprises crystallization from a water-containing solvent.
- 30 11. The production method of claim 10, wherein the water-containing solvent is a mixed solvent of alcohol and water.
12. The production method of claim 10, wherein the water-containing solvent is water.
